Research Interest

My research interest lies in *Machine Learning* and *Data Mining*, especially in **Recommender Systems** (cross-domain recommendation, social network analysis, rumor detection) and **Graph Theory** (spectral analysis, graph heterophily, node embedding, message-passing).

Education

•Arizona State University, Tempe — 2023. 11 - Current
Postdoctoral Researcher, Computer Science — PI: Dr. Selcuk Kasim Candan (co-PI: Dr. Huan Liu)

•Korea Institute of Energy and Technology — 2023. 09 - 2023. 10
Postdoctoral Researcher, Energy AI — PI: Dr. Chong-Kwon Kim

•Seoul National University — 2019. 03 - 2023. 08
Ph.D. & M.S., Computer Engineering — Advisor: Dr. Chong-Kwon Kim

•University of Seoul — 2013. 03 - 2019. 02
B.S., Computer Science — Advisor: Dr. Eui-Kyeong Hong

Selected Projects

•Can Large Language Model Improve the Text Convolution for Review-Based Recommendation? — Current
Research project, Emit Lab

- Integrating the large language model (e.g., Llama 2, GPT-4) with the text convolution algorithm
- Investigate whether applying summarization based on large language models first, instead of performing 2D convolution on the entire text, results in performance improvement

– Used online shopping mall datasets like Amazon and Walmart

•Selection Criteria and Assigned Weightage for Identifying Potential Locations Wetland 2024

Research project funded by NSF (in collaboration with Tulane University)

– Suggested knowledge transfer between different regions and adaptive propagation between grids
– Demonstrated the effectiveness of the framework through real-world scenario
– Used Natural Land Cover Dataset (NLCD), Soil Survey Geographic Database (SSURGO) datasets

•Causal Discovery of Agricultural Mgmt and Reservoir Op. Induced Water Quality Change 2023

Research project funded by NSF (in collaboration with University of Arkansas)

– Developed causal discovery algorithm for water quality improvement and reservoir management
– Considered spatial and temporal variations and validated the causal learning ability
– Used Natural Land Cover Dataset (NLCD), Soil Survey Geographic Database (SSURGO) datasets

•Tracking footprints with graph neural networks for the reduction of virus spread 2021 - 2022

Coursework project, R&D in AI industry

– Suggested spatial-temporal analysis for the next POI prediction to reduce virus spread
– Selected as social contributing project
– Used datasets are Coronamap of South Korea, Gowalla for POI prediction

•Personalized recommendation based on the user's purchasing histories and social network 2020

Industry project funded by Samsung Research

– Introduced time series analysis of users' purchasing history for personalized advertising
– Applied graph neural networks with binary recommendation techniques
– Used customer datasets provided by Samsung Research

•Next POI prediction based on user movements collected through large-scale sensors 2019

Research project funded by Samsung Electronics

– Recommending the next place based on where students visited within Seoul National University
– Developed energy-saving and effective multi-hop transmission technologies for sensor
– Collected datasets by attaching special stickers to participants

Skills

•Languages: Python, C, HTML/CSS

•Tools / Frameworks: PyTorch, torch-geometric, Scikit-learn, Git, Django, AWS, LaTex

Work Experience

•Graduate Research Assistant (RA) Sep. 2020 - Jun. 2021

Participating in 'Social Network-based Recommendation Project' funded by Samsung Research

•Teaching Assistant (TA) Mar. 2020 - Jun. 2020

Topic: Social Network Analysis and Anomaly Detection (Advisor: Chong-Kwon Kim)

•Graduate Research Assistant (RA) Mar. 2019 - Dec. 2020

Participating in 'Smart Campus Project' funded by Samsung

•(Internship) Software Development at nTOPAZ Jun. 2018 - Sep. 2018

Front & Back-end development for blockchain service
Tech: 1) Django & jQuery, 2) Node js, 3) JS & CSS

•Undergrad Research Assistant (RA) Jun. 2017 - Sep. 2017

Distributed Computing LabTg (Supervisor: Jin-Suk Kim)

Extracurricular Activities

•Invited Talk 2024
"Identifying Potential Sites for Wetlands" at N-EWN Partner Symposium

•Program Committee (PC) member 2024
ACM Multimedia Conference

•Journal Reviewer 2023
IEEE Multimedia

•Journal Reviewer 2023
PLOS ONE

Awards & Grants

•Best Ph.D. Dissertation Award 2023
Seoul National University

•Overseas Short-term Training Scholarship 2023
Chonnam National University

•BK21 Colloquium Graduate Student Fellowship 2023
Seoul National University

•BK21 Star Student Researcher Fellowship 2023
Seoul National University

•SIGIR Travel Awards 2022
For ACM Student Authors with Accepted Long Paper

•BK21 Scholarship 2020
(Graduate) Seoul National University

•Merit-based Scholarship 2018 - 2019
(Undergrad) University of Seoul
